

# Total Return Bond Fund

## CLASS INSTITUTIONAL ACCUMULATION AND INCOME SHARES

Morningstar Rating™ ★★★★★

### FUND DESCRIPTION

The investment objective of the Fund is to seek to maximise total return, consistent with preservation of capital and prudent investment management.

The Total Return Bond Fund is a diverse portfolio of intermediate-term, investment grade securities, actively managed to maximise total return while minimising risk relative to the benchmark. The Fund invests primarily in US government, mortgage and corporate bonds, but may have tactical allocations to municipal, high yield and non-US markets.

This Fund is an actively managed portfolio of core bonds that employs prudent risk management and seeks to maximize total returns in all market conditions.

The Fund may use or invest in financial derivatives.

The Fund takes a long-term view and uses multiple concurrent strategies to limit the likelihood that any single strategy that falls out of favor would negate the positive returns from other strategies.

### Sector Allocation (% Market Value)

Source: PIMCO, index provider for benchmark data. Dividend is not guaranteed. Past distributions are not necessarily indicative of future trends, which may be lower. A positive distribution yield does not imply a positive return. Data does not include special cash dividends. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund, be made out of either income and/ or capital of the Fund. In the case of the Fund, the Fund may at its discretion pay dividends out of capital which may result in an immediate reduction of the Fund's NAV per share. In the case of Income II Shares, the Fund may at its discretion pay dividends out of capital as well as take into account the yield differential arising from share class currency hedging (which constitutes a distribution from capital). The management and other fees payable by the Income II Shares may also be charged to the capital of the Income II Shares, resulting in an increase in distributable income available for the payment of dividends and therefore, the Income II Shares may effectively pay dividends out of capital. This may result in an immediate reduction of the NAV per share for the Income II Shares. Please refer to [www.pimco.com.sg](http://www.pimco.com.sg) for more information on income statistics. <sup>1</sup> Yields reported gross of fees, the deduction of which will reduce the yield. <sup>2</sup> Annualised Distribution Yield is as of last quarter ending 30/06/2021. <sup>5</sup> Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2021 Morningstar Ltd. All Rights Reserved.
