

Inflation Strategy Fund

INSTITUTIONAL CLASS ACCUMULATION SHARES

Fund Description

The Inflation Strategy Fund is a comprehensive real return asset allocation solution designed to hedge global inflation risks while targeting enhanced after inflation return. It invests actively in global inflation-linked bonds, commodities, emerging market (EM) currencies, real estate and gold. In addition, tail risk hedging strategies are used to limit the impact of periodic market stresses that may affect inflation-related assets.

Potential Investor Benefits

The potential benefits of the Inflation Strategy Fund include:

- * Strategic allocation to a comprehensive set of real assets, enhanced by active management of these assets.
- * Portfolio diversification relative to a traditional portfolio comprising stocks and bonds
- * Robust risk diversification and management, including strategies to explicitly hedge against systemic market risks

Potential Fund Advantage

The fund combines top-down macroeconomic views from PIMCO's Global Investment Committee and Asset Allocation Committee with bottom-up relative value ideas from the specialist Real Return team

Risk and Reward profile

Credit and Default Risk: A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk. **Commodities Risk:** The value of commodity related investments may fluctuate substantially due to changes in supply and demand and/or due to political, economic or financial events. **Currency Risk:** Changes in exchange rates may cause the value of investments to decrease or increase. **Equity Risk:** The value of equity or equity related securities may be affected by stock market movements. Drivers of price fluctuations include general economic and political factors as well as industry or company specific factors. **Derivatives and Counterparty Risk:** The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations. **Emerging Markets Risk:** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses. **Liquidity Risk:** Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price. **Interest Rate Risk:** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices). **Mortgage Related and Other Asset Backed Securities Risks:** Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk. **MLP Tax Risk:** The fund may be required to file tax returns and pay income taxes which may have the effect of reducing the fund's return. While investments in MLPs may subject the fund to U.S. taxation and return filing obligations, it is not expected that investments in derivative instruments such as total return swaps on MLPs will result in these same tax consequences, although there can be no guarantee.

The benchmark is the Inception to 3/31/17 45% Gbl Adv ILB Index, 30% FTSE NAREIT Gbl Real Estate Dev REITS Only Index, 15% BBG Commodity TR Index, 10% BBG Gold TR Index (USD Unhedged), 4/1/17 onwards 45% BBG Gbl Inflation Linked 1-30yrs Index, 15% BBG EM Gov ILB Index, 10% BBG Commodity TR Index, 10% FTSE NAREIT Gbl RE Dev TR Index, 15% Alerian MLP TR Index, 5% BBG Gold Subindex TR (USD Unhedged). All periods longer than one year are annualised. SI is the performance since inception.

ABOUT THE BENCHMARK

The fund is considered to be actively managed in reference to the below benchmark as further outlined in the prospectus and key investor information document.

The benchmark is a blend of 45% Bloomberg Global Inflation Linked 1-30yrs Index (USD hedged), 15% Bloomberg Emerging Market Government ILB Index (USD unhedged), 10% Bloomberg Commodity Total Return Index, 10% FTSE NAREIT Global Real Estate Developed Total Return Index (USD unhedged), 15% Alerian MLP Total Return Index and 5% Bloomberg Gold Subindex Total Return Index. The Bloomberg Global Inflation Linked 1-30yrs Index measures the performance of the major developed market government inflation-linked bond markets. It is market capitalization weighted and includes maturities up to 30 years. The Bloomberg Emerging Market Government ILB Index measures the performance of the major emerging market government inflation-linked bond markets and is market capitalization weighted. The Bloomberg Commodity Total Return Index is an unmanaged index composed of futures contracts on a number of physical commodities. The index is designed to be a highly liquid and diversified benchmark for commodities as an asset class. The FTSE NAREIT Global Real Estate Developed Total Return Index is a free-float adjusted, market capitalization-weighted index designed to track the performance of listed real estate companies worldwide. The Alerian MLP Total Return Index is a float-adjusted, capitalization-weighted index and the leading gauge of large and mid-cap energy master limited partnerships (MLPs). The Bloomberg Gold Subindex Total Return Index reflects the return on fully collateralized positions in the underlying commodity futures. It is not possible to invest in an unmanaged index

Unless otherwise stated in the prospectus or in the relevant key investor information document, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes. [†]

[†] Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. Yields reported gross of fees, the deduction of which will reduce the yield. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2022 Morningstar Ltd. All Rights Reserved.
