

As of 31 March 2022

Fact Sheet

MFS Meridian® Funds

Emerging Markets Debt Fund

Investment in the fund may involve a high degree of risk and may not be suitable for all investors. Past performance does not predict future returns and your capital is at risk. The value of the fund can be volatile and could decrease substantially in a short period of time. Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the portfolio's base currency, if different. Investors should not rely on this document alone to make investment decisions and the sales prospectus and KIID should be carefully considered before making any investment in the fund. **The fund specific risks include: bond risk, emerging markets risk, derivatives risk and high yield risk. These relevant risks, as associated with this fund, are highlighted and defined at the end of this document.**

Investment team

Portfolio Managers

- Neeraj Arora, CFA**
- 11 years with MFS
 - 17 years in industry
- Ward Brown, CFA, Ph.D.**
- 16 years with MFS
 - 26 years in industry
- Matt Ryan, CFA**
- 25 years with MFS
 - 35 years in industry

Institutional Portfolio Manager**

- Katrina Uzun**
- 3 years with MFS
 - 20 years in industry

Fund benchmark

JPMorgan Emerging Markets Bond Index Global

Focuses primarily on US dollar-denominated sovereign/quasi-sovereign debt issued by emerging market countries, with the flexibility to invest in local currency debt, including emerging market currencies; the fund may also invest in corporate debt issued by companies located in emerging market countries.

Key Points:

- Research-intensive approach focuses on outperformance through country and security selection, with an emphasis on managing downside risk
- Seeks to manage volatility and preserve flexibility through diversification and liquid holdings
- Team experience and continuity: Portfolio manager in place since 1998; Portfolio management team together since 2005

Portfolio structure (%)

- Bonds (91.3)
- Cash & Cash Equivalents (7.4)
- Other (1.1)
- Stocks (0.2)

Other consists of: (i) currency derivatives and/or (ii) any derivative offsets.

* Short positions, unlike long positions, lose value if the underlying asset gains value.

** Advises and communicates on the management of the portfolio, but is not responsible for day-to-day management.

Top holdings, portfolio characteristics and weightings do not reflect the effect of exposure/weightings for hedging of hedged share classes. Full holdings and net assets do reflect this hedging.

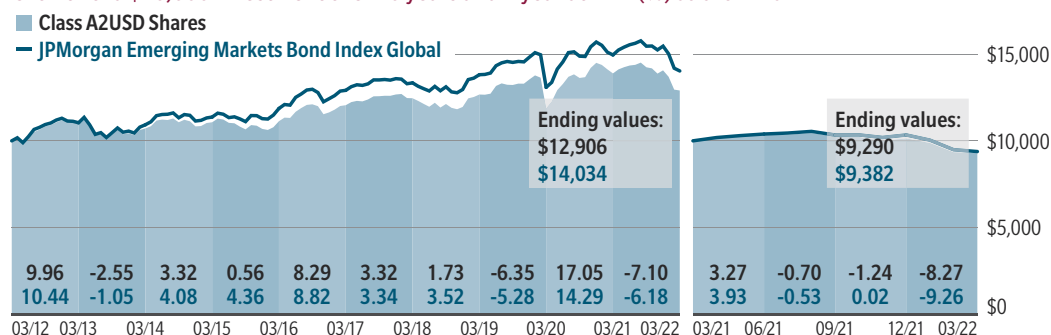

Portfolio characteristics are based on equivalent exposure, which measures how a portfolio's value would change due to price changes in an asset held either directly or, in the case of a derivative contract, indirectly. The market value of the holding may differ. The portfolio is actively managed, and current holdings may be different.

MFS Meridian Funds from time to time may be registered for sale in other jurisdictions or otherwise offered where registration is not required.

MFS Meridian Funds are not available for sale in the United States or Canada or to US persons. Information on investors rights is made available in English and, as the case may be, in local language at meridian.mfs.com. MFS Investment Management Company (Lux) S.à r.l. may decide to terminate the marketing arrangements of this fund in accordance with the appropriate regulation.

MAY LOSE VALUE - NOT GUARANTEED

Growth of a \$10,000 investment over 10 years and 1 year at NAV (%) as of 31-Mar-22

Fund returns assume the reinvestment of dividends and capital gain distributions but do not include a sales charge. Results would have been less favorable if the sales charge were included. This example is for illustrative purposes only and is not intended to represent the future performance of any MFS product. **Past performance is not a reliable indicator for future results.**

Please see reverse for complete performance information and important disclosures.

Past performance is not a reliable indicator for future results. All financial investments involve an element of risk. The value of investments may rise and fall so you may get back less than originally invested.

Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the portfolio's base currency, if different.

Other share classes are available for which performance and expenses will differ.

Returns would have been lower had sales charges, of up to 6% of the net asset value (NAV), or any commissions, fees or other charges that your financial intermediary may charge been reflected.

Please note that this is an actively managed product.

The Fund's benchmark is indicated for performance comparison only.

Performance results reflect ongoing charges and any applicable expense subsidies and waivers in effect during the periods shown. All historic results assume the reinvestment of dividends and capital gains.

The source for all fund data is MFS. Source for benchmark performance: SPAR, FactSet Research Systems Inc.

Fund Inception Date: 01 October 2002

[^] Results represent the percent change in NAV.

Periods less than one year are actual not annualized.

[†] Ongoing charges are expressed at an annual rate as a percentage of net assets and are based on expenses for the semi-annual period ending July 31 or annual period ending January 31. For a Class with less than the full period of data available, or where an adjustment is necessary to reflect current charges, the ongoing charges figure is an estimate. Ongoing charges may vary from year to year. Please see the KIID of the relevant Class for the most recent expense information.

¹ The MFS Meridian Funds offer several share classes each with different expenses. Performance reflects the performance of a relevant older class with the same currency until the actual start of class performance record of the class detailed. Performance for periods prior to that date may have been higher or lower had the actual share class fees and expenses been reflected.

² Hedged share classes aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class and the unhedged base currency class of the fund. From time to time shareholder transactions in the share class could result in a gain or a loss, which could be significant, in the share class value

that is attributable to the adviser's hedging activities rather than to its investment management activities. Other share classes will not share in these gains or losses.

Class I shares are only available to certain qualifying institutional investors.

Class W shares are available to discretionary portfolio management or independent advisory accounts, clients of financial intermediaries otherwise prohibited from receiving compensation from the Fund, and to employees of MFS and its affiliates.

CREDIT QUALITY[‡] (% OF TOTAL NET ASSETS)

U.S. Government	0.9
AA	2.8
A	7.6
BBB	19.9
BB	35.2
B	19.6
CCC and Below	4.6
Other Not Rated	0.7

Avg. credit quality: BB

[‡] The Average Credit Quality (ACQR) is a market weighted average (using a linear scale) of securities included in the rating categories. For all securities other than those specifically described below, ratings are assigned to underlying securities utilizing ratings from Moody's, Fitch, and Standard & Poor's rating agencies and applying the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. If none of the 3 Rating Agencies above assign a rating, but the security is rated by DBRS Morningstar, then the DBRS Morningstar rating is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). If none of the 4 rating agencies listed above rate the security, but the security is rated by the Kroll Bond Rating Agency (KBRA), then the KBRA rating is assigned. All ratings are subject to change. U.S. Government includes securities issued by the U.S. Department of the Treasury. Federal Agencies includes rated and unrated U.S. Agency fixed-income securities, U.S. Agency MBS, and CMOs of U.S. Agency MBS. Other Not Rated includes fixed income securities which have not been rated by any rating agency. The portfolio itself has not been rated.

TRAILING 3-YEAR RISK MEASURES VS. BENCHMARK (A2USD)

Standard Deviation	10.63 vs. 10.47
---------------------------	-----------------

Standard Deviation is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

RISK AND REWARD PROFILE CLASS (A2USD)

◀ Lower Risk (typically lower rewards)				Higher Risk ▶ (typically higher rewards)		
1	2	3	4	5	6	7
			4			

The rating is based on past volatility of returns and may be different in the future or for other classes of the fund.

See the fund's offering documents for more details, including information on fund risks and expenses.

The offering documents (sales prospectus and Key Investor Information Documents (KIID)), articles of incorporation and financial reports are available to investors at no cost in paper form or electronically at meridian.mfs.com, at the offices of the paying agent or representative in each jurisdiction or from your financial intermediary. KIIDs are available in the following languages; Danish, Dutch, English, French, German, Italian, Norwegian, Portuguese, Spanish, and Swedish. The sales prospectus and other documents are available in English. MFS Meridian Funds is an investment company with a variable capital established under Luxembourg law. MFS Investment Management Company (Lux) S.à.r.l. is the management company of the Funds, having its registered office at 4, Rue Albert Borschette, L-1246, Luxembourg, Grand Duchy of Luxembourg (Company No. B.76.467). The Management Company and the Funds have been duly authorised by the CSSF (Commission de Surveillance du Secteur Financier) in Luxembourg.

The funds have been registered with the Netherlands Authority for the Financial Markets referred to in Article 1:107 of the Act on Financial Supervision (Wet op het financieel toezicht), as an investment institution authorized pursuant to Article 2:72 of the aforementioned Act.

The funds are established as a "restricted foreign scheme" in Singapore; therefore, material in connection with the offer or sale of the funds may only be distributed to persons in Singapore that are qualified under Sections 304 and 305(2) under Chapter 289 of the Securities and Futures Act. This document has not been reviewed by the Monetary Authority of Singapore.

MFS Meridian Funds are recognised under Section 264 of the Financial Services and Markets Act of 2000 (reference number 435996) and U.K. investors should note that holdings of shares in the funds will not be covered by the provisions of the Financial Services Compensation Scheme, or by any similar scheme in Luxembourg.

Important risk considerations

The fund may not achieve its objective and/or you could lose money on your investment in the fund. ■ **Bond:** Investments in debt instruments may decline in value as the result of, or perception of, declines in the credit quality of the issuer, borrower, counterparty, or other entity responsible for payment, underlying collateral, or changes in economic, political, issuer-specific, or other conditions. Certain types of debt instruments can be more sensitive to these factors and therefore more volatile. In addition, debt instruments entail interest rate risk (as interest rates rise, prices usually fall). Therefore, the portfolio's value may decline during rising rates. Portfolios that consist of debt instruments with longer durations are generally more sensitive to a rise in interest rates than those with shorter durations. At times, and particularly during periods of market turmoil, all or a large portion of segments of the market may not have an active trading market. As a result, it may be difficult to value these investments and it may not be possible to sell a particular investment or type of investment at any particular time or at an acceptable price. The price of an instrument trading at a negative interest rate responds to interest rate changes like other debt instruments; however, an instrument purchased at a negative interest rate is expected to produce a negative return if held to maturity. ■ **Emerging Markets:** Emerging markets can have less market structure, depth, and regulatory, custodial or operational oversight and greater political, social, geopolitical and economic instability than developed markets. ■ **Derivatives:** Investments in derivatives can be used to take both long and short positions, be highly volatile, involve leverage (which can magnify losses), and involve risks in addition to the risks of the underlying indicator(s) on which the derivative is based, such as counterparty and liquidity risk. ■ **High Yield:** Investments in below investment grade quality debt instruments can be more volatile and have greater risk of default, or already be in default, than higher-quality debt instruments. ■ Please see the prospectus for further information on these and other risk considerations.

Benchmark and vendor disclosures

JPMorgan Emerging Markets Bond Index Global - measures the performance of U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds.

It is not possible to invest directly in an index.
