

First Quarter Market Review

# With BF&M's Andrew Spencer

Head of Investments

 Watch now

Did you know that contributing \$100 more a month could increase your balance at retirement by as much as \$150,000?

This example assumes you are 25, are retiring at 65, and you achieve an average annual rate of return of 5% in your account, but the benefit remains the same: no matter what your age or return—voluntary contributions can go a long way in helping you increase your savings and can result in higher income during retirement.

They also provide you with flexibility. Voluntary contributions can be withdrawn at any time. So, if you need to access additional savings before retirement to cover unexpected costs, these contributions are available to you.

**Making voluntary contributions is easy!**

Talk to your HR manager to have them automatically deducted from your payroll. It can be any amount of your choosing and can be started and stopped at any time. For more information, [click here](#).

Data obtained from Morningstar Direct. Risk profile performance is based on historical blend of actual managers. Individual fund performance reflects only the manager currently used for that asset class. Past performance is no guarantee of future performance. The price of the shares of each Profile and the income received from each Profile may go down as well as up, and investors may not get back the full amount that they invested. Investment in any of the Profiles involves risks. Currency fluctuations will affect the value of overseas investments. Information has been provided by BF&M Investment Services Limited, which is licensed to conduct Investment Business by the Bermuda Monetary Authority under the Investment Business Act.
