Marketing material

C Accumulation USD | Data as at 31.12.2022

Fund objectives and investment policy

The fund aims to provide capital growth in excess of the MSCI Emerging Markets (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of companies in emerging market countries worldwide.

Above is the Investment Objective of the fund. For details on the fund's Investment Policy please see the KID.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR).

The fund maintains a higher overall sustainability score than its sustainability benchmark based on the investment manager's rating system.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment.

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

C Accumulation USD | Data as at 31.12.2022

10 year return of USD 10.000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Derivatives risk: Derivatives may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Stock Connect risk: The fund may be investing in China "A" shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Sustainability risk: The fund has environmental and/or social characteristics. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

Synthetic risk & reward indicator (SRI)

LOWER RISK

Potentially lower reward

HIGHER RISK

Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Investor Information Document for more information.

Proprietary Sustainability Metrics %

Overall Impact

Data as at 30.12.2022

The sustainability scores of the fund and the benchmark are shown. The benchmark is the MSCI EM (Emerging Markets).

The Schroders Impact score is based on Schroders' proprietary tool, SustainEx™. SustainEx™ provides an estimate of the potential societal or environmental impact that may be created by the companies and other issuers in which the fund is invested. The result is expressed as a notional percentage (positive or negative) of sales of the relevant underlying companies and other issuers. For example, a SustainEx™ score of +2% would mean a company contributes \$2 of relative notional positive impact (i.e. benefits to society) per \$100 of sales.

We calculate SustainEx™ scores for companies and other issuers in the fund to arrive at the total fund score.

The "Overall Impact" shown is a measure of the fund's estimated impact compared to that of its benchmark, in each case calculated as a relative notional percentage as described above.

The "Impact on People" and "Impact on Planet" measure the fund's estimated underlying benefits and harms, as compared to its benchmark, in each case calculated as a relative notional percentage as described above.

Overall Impact On: People

Climate dashboard

Carbon Intensity

Tonnes of CO2 per \$mn sales

Source: MSCI. Carbon Intensity is based on reported scope 1 & 2 emissions. Fossil Fuel Exposure charts for sub-funds that are categorised as Article 8 or Article 9 under SFDR apply a revenue-based exclusion on companies operating in the coal sector. Companies generating more than 10% of their revenue from thermal coal extraction and companies that generate more than 30% of their revenue from coal-fired power are systematically excluded. Some sub-funds apply a more stringent exclusion criterion. Any fund exposure to coal reflects investments in companies whose coal-related revenues are below the accepted threshold. Please refer to the fund sustainability disclosures for more details on exclusions. The fund's sustainability benchmark is MSCI EM (Emerging Markets).

Sustainability performance measures

The below table shows sustainability performance measures of this fund. It uses reported company data to identify or derive Environmental, Social and Governance (ESG) metrics on an objective basis. With this we compare a range of ESG metrics for the fund and its benchmark where applicable, and identify the measure coverage of the fund. The charts illustrate how the portfolio and benchmark compare for each metric.

Category	Measure	Description	Units	Fund	Benchmark
People	Policy Human Rights	Does the company publish a policy governing human rights standards of its operations?	% of companies with a policy on human rights in place	78,5% Coverage: 94,1%	74,9% Coverage: 98,1%
	Board Gender Diversity	Percentage of women on the Board	% Average percentage of women on boards	18,2% Coverage: 92,3%	14,0% Coverage: 98,2%
	Employees Community Work Program	Is there a programme for employees to volunteer with community initiatives?	% of companies with Employees Community Work programmes in place	82,1% Coverage: 94,1%	87,0% Coverage: 98,1%
	Independent Board Members	Percentage of independent directors on the Board	% of total directors who are independent	55,7% Coverage: 92,3%	49,7% Coverage: 98,2%
	CEO-Chairman Separation	Has the Chairman ever been CEO?	% of companies where the Chairman has not been CEO	68,7% Coverage: 94,1%	60,6% Coverage: 98,2%
Planet	Water Intensity	Water withdrawal relative to each \$1mn of sales	Cubic metres of water per \$mn sales	2.065,4 Coverage: 69,0%	35.684,9 Coverage: 71,6%
	Policy Energy Efficiency	Does the company publish a policy to improve energy efficiency?	% of companies with a policy on energy efficiency in place	98,6% Coverage: 94,1%	95,2% Coverage: 98,1%
	Policy Emissions Reduction	Does the company publish a policy to reduce GHG emissions?	% of companies with a policy on emission reduction in place	94,9% Coverage: 94,1%	93,6% Coverage: 98,1%

Source: Refinitiv as at 30.12.2022. The analysis shown is based on company disclosed information. Coverage is calculated based on the average weighted by holding percentage for each metric for the fund and benchmark. Coverage shows the % of company reported data that is available for each measure for the fund and the benchmark. The fund's sustainability benchmark is MSCI EM (Emerging Markets).

Information relating to changes in fund manager, investment objective, benchmark and corporate action information

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The fund's performance should be assessed against its target benchmark being to exceed the MSCI Emerging Markets (Net TR) index. The fund's investment universe is expected to overlap materially, directly or indirectly, with the components of the target benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide.

Benchmarks:

The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

Benchmark names in this document may be abbreviated. Please refer to the funds' legal documents for the full benchmark name.

C Accumulation USD | Data as at 31.12.2022

Source and ratings information

Source of all performance data, unless otherwise stated: Morningstar, bid to bid, net income reinvested, net of fees.

Schroders' Proprietary tools, including SustainEx, may not cover all of the fund's holdings from time to time, in which case Schroders may use a range of alternative methods to assess the relevant holding. In addition, certain types of assets (such as cash and certain equivalent securities) are treated as neutral and are therefore not considered by our proprietary tools. Other types of assets such as equity indices and index derivatives may not be considered by our proprietary tools and in such case would be excluded from a product's sustainability score.

Impact scores: These are generated using Schroders' proprietary tool SustainEx™. SustainEx™ provides an estimate of the potential "impact" that an issuer may create in terms of net social and environmental "costs" or "benefits" of that issuer. It does this by using certain metrics with respect to that issuer, and quantifying them positively (for example by paying 'fair wages') and negatively (for example the carbon an issuer emits) to produce an aggregate notional measure of the relevant underlying issuer's social and environmental "costs", "externalities" or "impacts". SustainEx™ utilises and is reliant on third party data (including third party estimates) as well as Schroders' own modelling assumptions, and the outcome may differ from other sustainability tools and measures.

Where SustainEx™ relies on data and estimates produced by third parties, Schroders seeks to ensure that such data and estimates are accurate, but Schroders cannot and does not warrant the accuracy, completeness and adequacy of such third party data and estimates. Like any model, SustainEx™ will evolve and develop over time as Schroders continues to assess, refine and add to the metrics and their relative contributions. Generating SustainEx™ scores involves an element of judgment and subjectivity across the different metrics chosen by Schroders, and accordingly Schroders does not accept any liability arising from any inaccuracy or omission in, or the use of or reliance on, SustainEx™ scores. As the model evolves, changes made to how metrics are applied may result in changes to the SustainEx™ score of any issuer and ultimately the overall fund/portfolio score. At the same time, of course, the issuer's SustainEx performance might improve or deteriorate.

The SustainEx scores show month-end data. Where a fund maintains a higher overall sustainability score than its sustainability benchmark based on the investment manager's rating system, this means that the fund's weighted average score in SustainEx over the previous six month period will be higher than the benchmark's score in SustainEx over the same period, based on month-end data. Where a fund maintains a positive absolute sustainability score based on the investment manager's rating system, this means that the fund's weighted average score in SustainEx over the previous six month period will be higher than zero over the same period based on month-end data and any comparison to its benchmark's score is shown here for information and illustrative purposes only. Where a fund has different sustainability criteria, the fund's weighted average score in SustainEx compared to its benchmark's score is shown here for information and illustrative purposes only.

Aggregated SustainEx metric definitions are: Carbon emissions: Environmental and societal cost of carbon emissions (scope 1,2 and 3). Water consumption: Environmental and societal cost of companies' and countries' freshwater withdrawal. Assigned based on reported water usage. Avoided carbon emissions: Environmental and societal benefits of activities and technologies that enable system-wide reductions in carbon emissions, including companies' products and services and country investments in clean energy. Fair pay: Societal benefits or costs of companies over- or under-paying staff relative to local living wages (for regions in which they operate). Alcohol: Societal cost of alcohol consumption (assigned to alcohol producers). Tobacco: Societal cost of smoking (assigned to tobacco producers). Fossil fuel exposures definitions are: Coal exposure: Measures the weight of the portfolio exposed to companies deriving revenue from the mining of thermal coal (including lignite, bituminous, anthracite and steam coal) and its sale to external parties. It excludes: revenue from metallurgical coal; coal mined for internal power generation (e.g. in the case of vertically integrated power producers); intra-company sales of mined thermal coal; and revenue from coal trading. Tar sands exposure: Measures the weight of the portfolio exposed to companies deriving revenue from oil sands extraction for a set of companies that own oil sands reserves and disclose evidence of deriving revenue from oil sands extraction. This factor does not include revenue from non-extraction activities (e.g. exploration, surveying, processing, refining); ownership of oil sands reserves with no associated extraction revenues; revenue from intra-company sales.

MSCI ESG Research rating: Produced by MSCI ESG Research as of the "reporting date". MSCI ESG Research LLC's ("MSCI ESG") Fund Metrics and Ratings (the "Information") provide environmental, social and governance data with respect to underlying securities within more than 31,000 multi-asset class mutual funds and ETFs globally. Important information

Costs

Certain costs associated with your investment in the fund may be incurred in a different currency to that of your investment. These costs may increase or decrease as a result of currency and exchange rate fluctuations.

If a performance fee is applicable to this fund, details of the performance fee model and its computation methodology can be found in the fund's prospectus. This includes a description of the performance fee calculation methodology, the dates on which the performance fee is paid and details of how the performance fee is calculated in relation to the fund's performance fee benchmark, which may differ from the benchmark in the fund's investment objective or investment policy.

For further information regarding the costs and charges associated with your investment, please consult the funds' offering documents and annual report.

General

The fund has environmental and/or social characteristics within the meaning of Article 8 of Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). For information on sustainability-related aspects of this fund please go to www.schroders.com

This document does not constitute an offer to anyone, or a solicitation by anyone, to subscribe for shares of Schroder International Selection Fund (the "Company"). Nothing in this document should be construed as advice and is therefore not a recommendation to buy or sell shares. Subscriptions for shares of the Company can only be made on the basis of its latest Key Investor Information Document and Prospectus together with the latest audited annual report (and subsequent unaudited semi-annual report, if published), copies of which can be obtained, free of charge, from Schroder Investment Management (Europe) S.A. These documents are available in English, French and German. Investment in the Company may not be suitable for all investors. Investors with any doubts as regards suitability should contact their independent investment advisers. An investment in the Company entails risks, which are fully described in the prospectus. Schroders has expressed its own views and opinions in this document and these may change.
