

Benchmark: MSCI World Small Cap NR USD

Investment Strategy

The Fund seeks to provide long term growth of capital by tracking the performance of the Morgan Stanley Capital International (MSCI) Small Cap World Index, a market capitalisation weighted index of small cap companies in developed countries. The Fund employs a "passive management" or indexing investment strategy designed to track the performance of the index by investing in all, or a representative sample, of the securities that make up the index, holding each stock approximate proportion to its weighting in the index.
