STATISTICAL DATA (CLASS A USD)

	5 Years
Volatility	11.35

Past performance is no guarantee of future results. The value of investments and the income from them will vary. Your capital is at risk. Performance data are provided in the share class currency, and include the change in net asset value and the reinvestment of any distributions paid on Portfolio shares for the period shown. Performance data are net of management fees, but do not reflect sales charges or the effect of taxes. Returns for other share classes will vary due to different charges and expenses.

The actual return achieved by investors in other currencies may increase or decrease as a result of currency fluctuations.

Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate—fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely.

The Portfolio is a sub-fund of AB FCP I, a mutual investment fund (fonds commun de placement) organized under the laws of the Grand Duchy of Luxembourg.

INVESTMENT RISKS TO CONSIDER: Investment in the Fund entails certain risks. Investment returns and principal value of the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Dividends are not paid for all share classes and are not guaranteed. The Fund is meant as a vehicle for diversification and does not represent a complete investment program. Some of the principal risks of investing in the Fund include emerging markets risk, liquidity risk, portfolio turnover risk, derivatives risk, OTC derivatives counterparties risk, structured investments risk, fixed income securities risk, lower-rated and unrated instruments risk, sovereign debt obligations risk and corporate debt obligations risk. These and other risks are described in the Fund's prospectus. Prospective investors should read the prospectus carefully and discuss risk and the fund's fees and charges with their financial adviser to determine if the investment is appropriate for them.

This financial promotion is directed solely at persons in jurisdictions where the funds and relevant share class are registered or who may otherwise lawfully receive it. Before investing, investors should review the Fund's full Prospectus, together with the Fund's Key Investor Information Document (KIID) or Key Information Document (KID) and the most recent financial statements. Copies of these documents, including the latest annual report and, if issued thereafter, the latest semi-annual report, may be obtained free of charge from AllianceBernstein (Luxembourg) S.à r.l. by visiting www.alliancebernstein.com or www.eifs.lu/alliancebernstein, or in printed form by contacting the local distributor in the jurisdictions in which the funds are authorised for distribution.

1 Bloomberg Global High Yield Index (USD hedged) provides a broad-based measure of the global high-yield fixed income market. An investor cannot invest directly in an index, and their results are not indicative of the performance for any specific investment, including an AB fund. Indices do not include sales charges or operating expenses associated with an investment in a mutual fund, which would reduce total returns.

2 Life performance is from closest month-end after inception date of Class A. See page 1 for inception dates.

3 Net asset value is denominated in the share class currency.

4 Top 10 Credit and Emerging Market Securities shows the percentage of assets held in debt securities of corporate issuers. It does not include assets held in debt securities of government issuers. Investors should refer to the most recent complete Portfolio of Holdings Report published on www.alliancebernstein.com for a complete list of holdings within the Portfolio.

5 The highest of S&P, Moody's, Fitch, or other nationally recognized statistic rating organizations (NRSROs). Not rated securities are those rated by another NRSRO and/or AB. Credit quality is a measure of the creditworthiness and risk of a bond or portfolio, based on the issuer's financial condition. AAA is highest and D is lowest. Ratings may not accurately reflect credit risk and are subject to change.

Note to Canadian Readers: AllianceBernstein provides its investment-management services in Canada through its affiliates Sanford C. Bernstein & Co., LLC and AllianceBernstein Canada, Inc.

Morningstar ratings are only shown for the fund's base share class with a 4- or 5-star rating. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star.
