Global Inflation-Linked Bond Fund

Aberdeen Standard
Investments

30 June 2018

The fund aims to provide a long term real return in USD from a combination of income and capital growth by investing predominantly in sovereign-issued and corporate inflation-linked bonds. The fund is actively managed by our investment team who may also invest in other bonds (such as conventional government bonds and investment grade corporate bonds) and money market instruments such as Certificates of Deposits (CDs) and Floating Rate Notes (FRNs) to try to take advantage of opportunities they have identified.

Past performance is not a guide to future returns and future returns are not guaranteed. The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment. The fund may use derivatives to reduce risk or cost, or to generate additional capital or income at low risk, or to meet its investment objective. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks. The value of assets held within the fund may rise and fall as a result of exchange rate fluctuations.
